What is the basis for reported actual monthly variance data?

What is the basis for reported actual monthly oil and gas volumes?

What are adjustments to reported actual monthly wellhead production/sales?

If adjustments are made to wellhead prices, please explain (e.g., Transportation Costs, Processing Costs, Commodity Price Hedges, etc.)

Where are reported actual and quarterly COPAS/Management fees reflected?

If relevant, explain unlabeled (other) columns in projected engineering report.

**Enhancement Notes**

This applies to the AFE System and the AFE Summary. Can we limit the row height to something manageable, like five rows. Also, can we fix the title row at the top so that when you scroll, you have some idea of the column heading. Go to Non-CAPEX AFE's for HLI the row height issue, there is some long text boxes for the AFE description. My preference would be for a hover box to appear if the text exceeds the five row height with the current width. I am struggling with all the scrolling.
